

Practice Enterprise

Electronics 1

Situation

PE1

- Basic project
- Pitch and present
- Work in small team
- 6SP → 180 hours of work

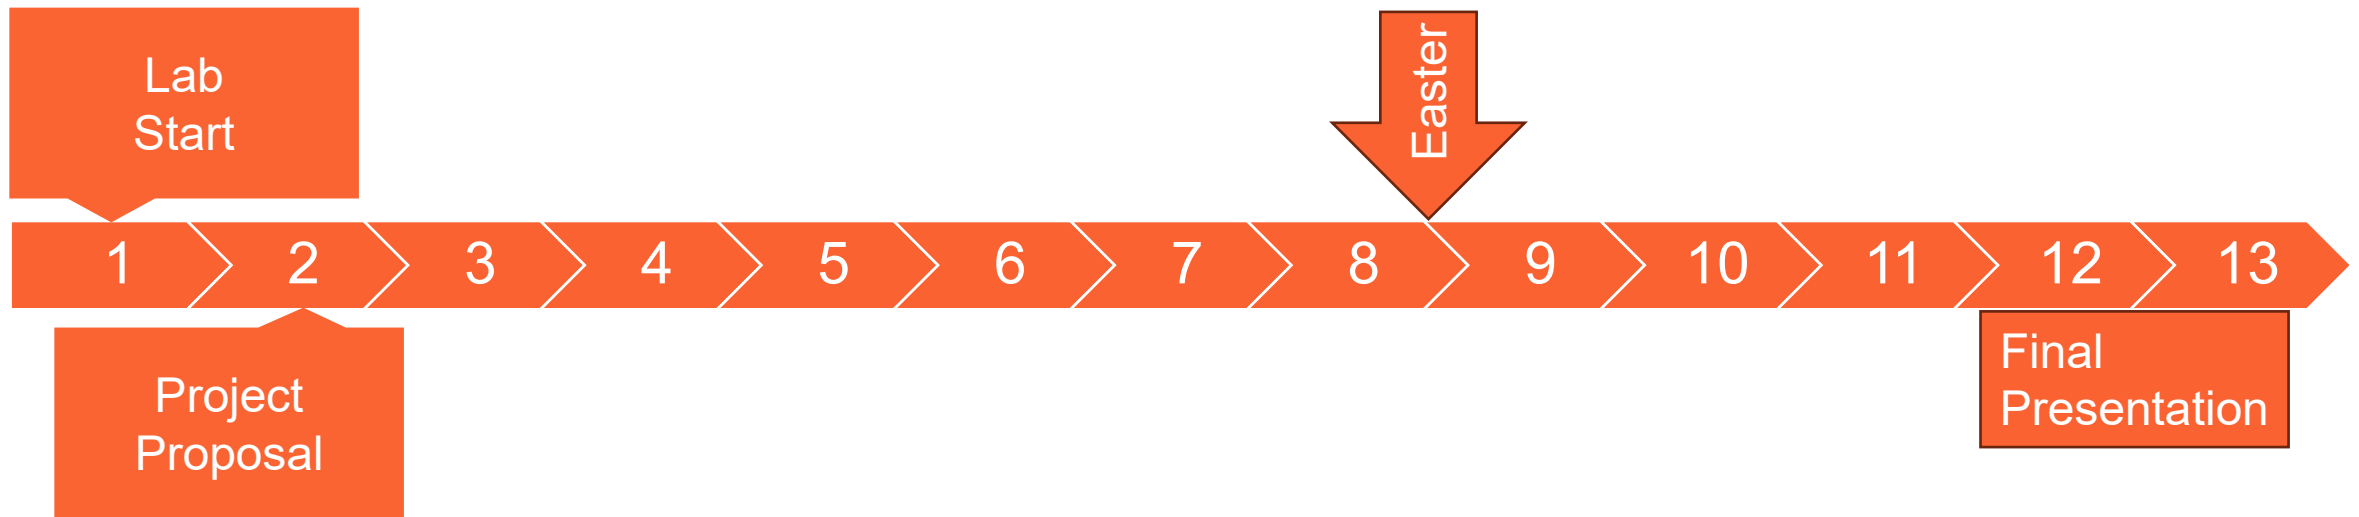

PE2

- More complex project
- 9SP → 270 hours of work

Bachelor Thesis

- Work in professional environment
- Work full-time on project
- 30SP → 900 hours of work

Planning

Goals

- Multidisciplinary
 - Integrating knowledge and skills from different subjects and self-search, find, use, lifelong learning...
- Practice soft skills
 - Including: cooperation, reporting and presentation
- Project management
 - Planning, documenting and good workmanship
- Apply experience in Enterprise Practice 2 and Bachelor thesis
 - "learning" from idea to 'product / service / application'

What is expected

- Approved project proposal
- Plan of action (document)
- Log (calculations, sketches, meeting minutes, problems, scope changes, ...)
- Activity tracking “who spends how much time on what?” (Gantt, Trello, ...)
- GIT repository
- Final report (document)
- **Working project**

Presentation

10 minutes presentation

10 minutes demonstration

10 minutes questions/defence

Project proposal

- Proposal feedback – reasons of rejecting
 - Challenge: too easy / difficult / ...
 - Scope & Feasibility: Unclear / Technical / financial / workload / ...
 - Planning: Unfair assignment of tasks, unrealistic expectations, ...
- Approval may require multiple adjustments

Project proposal

- Title: Practice Enterprise Project
- Short functional description of the project
- What problem do you want to solve?
 - How will you solve the problem?
- Graphical presentation: Block or functional diagram
- Budget estimation for any purchase
- High-level planning and division of work between team members

Remarks

- NO MODULES as first solution
 - Design your own circuits:
 - PSU
 - microcontroller breakout
 - ...
- Can use any controller
 - Do not program using libraries
 - Write your own code!
- We can give you XC888 (8051) as long as we have stock
